

Industria, S.A.S., a CIRCOR Aerospace company, is dedicated to the design and manufacture of fuel, hydraulic, pneumatic components and electromechanical systems for the aerospace, defense, space, Formula 1, and other high technology industries.

From the facility located near Paris, France, Industria supplies several mission-critical solenoid valves and pressure switches. Applications for solenoid and valve controls include braking systems, primary and secondary flight control, as well as pumps and other sub-systems for pressure and flow control. Industria also manufactures fuel control valves used on turbine engines and auxiliary power units.

Designed to resist the most hostile vibration, temperature, and environmental requirements, Industria's pressure switches and self-sealing couplings are used on numerous fixed-wing aircraft and rotorcraft, ground-based equipment, and naval applications.

Industria is a long-standing supplier on all new and current Airbus production aircraft, including the A380 and A400M. Industria operates under a Kanban system, which helps improve delivery performance and assures a smooth production/delivery cycle.

Industria embraces the principles of Lean and Six Sigma, and implements these throughout the design and manufacturing processes. Industria utilizes the latest in engineering and manufacturing technology and tools to evolve design concepts into hardware solutions qualified to meet the most demanding requirements. Most qualification testing can be completed in-house, ensuring rapid development cycles.

PRODUCTS / SERVICES

- Solenoids
- Solenoid valves
- Pressure switches
- Self-sealing couplings
- Manifold blocks
- Pneumatic rescue power systems
- Motor-operated valves
- Integrated hydraulic and fuel manifolds
- Door detectors
- Electro distributors
- Overhaul and repair

KEY PLATFORMS

- Airbus A318/A319/A320/A321/A330/340/A380/A400M
- EADS Eurofighter
- Dassault Aviation Falcon 50, 2000, 7X and Rafale
- Embraer 135/145/170/190
- Bombardier Dash 8-400, CRJ700
- Gulfstream G200
- V-22 Osprey
- C-17 Globemaster III
- Ariane 5 and satellites
- Agusta, Denel, Eurocopter, Sikorski helicopters

QUALITY CERTIFICATIONS

- EN9100
- JAR 145
- FAR 145 following INSY 306X agreement
- JAR 21 sub part G
