Check Valves

100 Series
0 to 25 psig Check Valves

How it Works

Open
Full flow passages offer minimum restriction to flow. Spring is completely removed from flow path.

Closed
As the inlet supply pressure decreases, a light spring closes the poppet, positioning the knife-edge automatically in line of contact sealing against the o-ring. The impression of the knife edge is limited by a metal-to-metal seat, which carries the reverse pressure load and serves to prevent sticking of the o-ring.

Features & Benefits

Low pressure
• Lightweight check valve for pressures to 25 psig.

Ultra-sensitive
• Unique design allows flow with minimum pressure differential. Cracking pressure is 4˝ H₂O maximum.

Positive sealing
• Unique knife-edge on the poppet positions snugly to provide zero sealing even with extremely low pressure.

Zero leakage
• Compact, easy installation. Efficient, inline design reduces size and weight. The valve can be mounted in any position.

Dimensions

O-RING MATERIAL & TEMPERATURE RANGE

19 Buna N, −40° F to +250° F
32 Viton®, −20° F to +400° F

MATERIAL

A Aluminum
B Brass
T 303 stainless steel†
T1 316 stainless steel

† Not available for PED applications.

Flow Curve

Pressure Drop PSI vs Rate of Flow—C.F.M. Standard Air

How to Order

1 19 B – 2 PP

CONNECTIONS—INLET/OUTLET

P Female pipe, NPT

VALVE SIZE

1 ¼”
2 ½”
3 ¾”
4 1”
6 1¼”

Repair Kits

In normal service, the only part(s) which may require replacement is(are) the seal(s). A repair kit may be ordered by placing a ‘K/’ in front of the complete part number (i.e. K/119B–2PP).

Although we offer separate kits where o-ring replacement is considered necessary, factory repair is recommended. Because of the ultra-sensitive characteristics of this valve, extreme care is necessary to insure that the o-ring is properly fitted into the groove without being twisted or distorted.

For Your Safety

It is solely the responsibility of the system designer and user to select products suitable for their specific application requirements and to ensure proper installation, operation, and maintenance of these products. Material compatibility, product ratings and application details should be considered in the selection. Improper selection or use of products described herein can cause personal injury or property damage.
